

## Unit 4 Reading Worksheet 2

Name \_\_\_\_\_

# Restaurants Around the World

These two friends like eating at an ice restaurant. Their **drinks** are in frozen glasses!

**T**here are millions of restaurants around the world. Many of them are similar: they have got tables, chairs, servers, customers and food. But some are very different!

Can you imagine eating dinner and not seeing your food? There are some restaurants that can serve food in the dark! The servers have got special **night-vision** glasses so they can see. Customers say that the food is very good!

Do you like **seafood**? You can eat some fish surrounded by fish at **aquarium** restaurants. Some are completely underwater—the whole restaurant is under water! Others are like normal restaurants with giant aquariums.

Some restaurants can **revolve** while the customers eat! They are usually on the top **floor** of a building. They can move very slowly and they have got a lot of windows!

There are restaurants in trees and restaurants that can float on water. There are restaurants made of ice and restaurants that have got robot servers. Can you believe it? It's true!

### 1 Read and complete.

**W**ords: aquarium lights millions move servers water

- There are millions of restaurants around the world.
- At restaurants without \_\_\_\_\_, the servers have got special glasses.
- A revolving restaurant can \_\_\_\_\_.
- Some \_\_\_\_\_ restaurants are completely underwater.
- There are restaurants that float on \_\_\_\_\_.
