I love life simulation games. This is the house I designed for Meghan, my virtual character. It isn't a very big house really. It's by the river and it's got a small garden and a garage for just one simple and classic car. There's a kitchen and a table with six chairs and a nice window with a garden view. There's a small but comfortable living room between the kitchen and Meghan's bedroom. In the living room there are three colourful sofas, two pictures on the walls and a fabulous green plant on the coffee table. There's a big smart TV too between a tall lamp and a small bookcase. And a rug under the coffee table, of course. The bedroom is just lovely. It's got an extra bed for guests. There are many cushions on both beds. There's a laptop and a lamp on the desk. There's a box under one of the beds with some magazines in it. What else? Well... I think this is a fantastic house for Meghan.
