## TRACK 9 – Transcript

**Speaker:** *Teens consider that being an influencer, a software developer and a video game designer are the most exciting jobs. And most of them are interested in doing these jobs in the future. Many teenagers think that traditional jobs are boring and they aren't afraid of doing jobs that maybe don't even exist at present. Their career aspirations are related to the development of new technologies and they believe that they will be responsible for different roles as technology rapidly changes. Regarding working hours, they don't think that nine-to-five jobs will be the norm in the future. And some of them prefer flexible schedules so that they can have work/life balance. Besides, they would choose a job with those conditions instead of one with a high salary and office hours.*
